

SPERTAVO

Built on expertise. Delivered with trust.

QA services powered by our AI-enabled test management platform

About the company · 2026

MENA · Asia · Europe · Americas

One engagement — platform, methodology, and experts

When you hire Spertavo, you do not only buy testing hours. You get a complete quality system.

01

Spertavo platform with AI

Cloud TMS with AI that analyzes requirements and code, assesses change impact, and drafts test cases and checklists.

02

Proven methodology

Processes refined over years of projects — embedded in the platform so every engagement follows the same standard.

03

Processes in the system

Plans, runs, roles, reporting, and workflows live in Spertavo — not in spreadsheets or ad-hoc tools.

04

Expert practitioners

Testers who know the methodology and work daily in the platform — faster ramp-up, consistent quality.

Full-spectrum quality engineering

All work is planned, executed, and reported in the Spertavo platform with AI assistance.

Web & desktop testing

Regression testing

Dedicated competence centers

Test automation

Performance & load testing

Specification testing

Testing outsourcing

Mobile testing

Acceptance testing

Usability testing

Testing actively runs on Spertavo with AI

01

Plan in the platform

Test plans, suites, and scope live in Spertavo — shared with your team in real time.

02

AI accelerates design

AI analyzes requirements and repositories, assesses change impact, and drafts cases and checklists for expert review.

03

Execute & report

Manual and automated runs, defects, and status are tracked in one place with clear ownership.

04

Decide on data

Dashboards, heat maps, and trends support release readiness — not opinions from chat threads.

Practitioners of the methodology and the platform

~80

Specialists

Full stack

C#, Java, Python; front & back-end testing

Mobile

Dedicated mobile testing practice

Process

Waterfall and iterative delivery experience

Why this matters for you

Our experts do not learn a random tool on day one. They already work in Spertavo, apply the same methodology, and use AI features as part of daily practice — so onboarding is short and quality is consistent from the first sprint.

Standard deliverables — managed in Spertavo

Test plan	Defines test types and scope — what is tested and why.
Checklist	Shows functional coverage for the client at a glance.
Test cases	Step sequences and expected results for each check.
Test report	Results of execution, ready for stakeholders.
Traceability matrix	Requirements mapped to covering test cases.

We measure quality on every project

Defects found

Defects escaped

Effort (hours)

Effort per defect found

**Defects found within test
cases**

**Defects found outside
planned cases**
